

SOLUTIONS FOR WOOD PROCESSING INDUSTRY

We offer customers in the timber and wood working industries - from skilled craftsmen to industrial giants - the optimal solution for each air extraction and dust filtration application. After a precise analysis of a customer's needs, we develop an individual plant and equipment concept that includes a complete economic analysis.

Scheuch is a highly qualified partner for problem areas involving chips, sawdust, paint overspray and flue gas.

We guarantee operational safety and reliability through a program of one-on-one consultation and a comprehensive customer support program. We achieve the highest levels of safety for your workers and the environment through the use of equipment that is specially designed for its fireproofing, explosion proofing and soundproofing characteristics.
